## Summary

Results-driven System Analyst at HPE with expertise in backend automation, server maintenance, and data processing. Proficient in Python, SQL, and Flask for building scalable web solutions and optimizing workflows. Passionate about leveraging code to solve complex infrastructure problems and streamline data pipelines.

## Experience

**System Analyst**        12/2023 – Present
*Hewlett Packard Enterprise* 🔗        📍 Pune

- Maintained critical server infrastructure, ensuring 99.9% system uptime through proactive monitoring and troubleshooting.
- Developed Python automation scripts to replace manual log analysis, reducing routine maintenance time by 20%.
- Collaborated with cross-functional teams to resolve hardware and software escalations, adhering to strict SLAs.
- Executed complex SQL queries to extract operational data, assisting management in resource allocation decisions.

## Education

**Bachelor of Technology (B.Tech)**        10/2019 – 09/2023
*G.H Raisoni College Of Engineering & Management* 🔗        Pune
CGPA: 7.15

## Skills

| **Python** | **SQL** | **HTML5** | **CSS3** |
|---|---|---|---|
| **Backend & Data** | **Tools & Platforms** | **Core Competencies** | |
| Flask, Pandas, NumPy, ETL Pipelines | Git, GitHub, VS Code, Linux, SQL Server | System Analysis, Server Maintenance, Database Management, Automation | |

## Languages

**English**
Fluent

## Projects

**Personal Portfolio & Chatbot**        12/2025
*Personal Portfolio Web Application Tech Stack: Python, Flask, Jinja2, HTML5, CSS3*

- Architected a personal brand website with a modular backend using **Flask** and **Jinja2** templating.
- Developed a rule-based **chatbot** using Python and JSON to automate user interactions.
- Implemented a dynamic "Print-to-PDF" feature to render clean, ATS-compliant resumes on demand.
